NORTHWESTERN Evanston, Ill., May 22 (Special).—The appearance this week of the catalogue of Northwestern University for the current academic year affords an excellent means for judging the work and value of that in sitution. By making a comparison between the uni-Rogers began his administration, and the university as it is to-day, the rapidity and solidity of its recent growth can, in a measure, he gauged. The catalogue of 1880-70, the last that appeared before the death of the honored Dr. Joseph Cummings, represents eight de-partments including the Preparatory School and the Schools of Art, Music and Oratory. These eight, however, were loosely bound together, some of them hav-ing independent boards of trustees and maintaining a dmply nominal relation to the university. The faculty list for the eight departments included 108 names, to the degree-conferring schools while the number of students in all departments was 1,002, of whom only 836 were pursuing courses lend ing to a baccalaureate or a professional degree. On the contrary, the catalogue for 1891-792 is representative of purely collegiate or professional work as done in the College of Liberal Arts, the two Schools of Medicine, the Schools of Theology and the Schools of Law, Pharmacy and Dentistry; the Schools of Music and Oratory, and the Preparatory Schools (which do not confer degrees) not being given a place in it. In the legree-conferring departments-assisted by 35 lecturer been in attendance on courses leading to degrees, as against 836 in similar courses two years ago, making a grand total of 2,301 in all departments of the university, as against 1,602 in 1889; an increase of 100 all departments.

still more gratifying. In 1889-90, a faculty of 14 gave instruction to 253 students; this year the faculty numbers 27 professors and instructors assisted by 5 lecturers of National reputation. The number of students has grown to 300, an increase of 57 per cent. While the faculty has been calarged by 68 per er percentage of increase in work done is apparent. an increase of 85 per cent. This is an increasnot simply in the number of courses offered by the college, but in the number of courses by the individual this year 224 hours, an increase of 100 per cent. The 41 courses two years ago received, on an average each week 2.2.3 hours each; the 76 to-day receive on an average, 3 hours each.

WESTERN RESERVE UNIVERSITY. Cleveland, May 22 (Special).-Next year the Western Reserve University will add seventeen new professors to its teaching force, making the total number eighty and ninety. Of these, twelve go to the two new departments to be opened in September, the College of Law and the College of Dentistry, and five to the College for Women. The College for Women has had a somewhat surprising growth. Established four years ago, it already has an independent endowment of nearly \$300,000, of which \$50,000 has been presented within the last few months. Its two new buildings, Clark Hall and Guilford Cottago, are to be ready for occupancy before the June commencement. From the advance sheets of a forthcoming ann ment of the work in the College for Women, it appears that the faculty for next year will consist of eighteen regular members, besides two non-resident lecturers and the instructors in physical culture and in music. Of these eighteen, five are new appointments, and will begin their duties in september. The chair of mathematics, which is to be occupied by a woman, is to be filled before september. An interesting feature of the work at the College for Womer is a newly established lectureship on Shakespeare. Professor Thomas R. Lounsbury, of the Sheffield Scientific School of Yale University, has accepted the place of lecturer, and will begin his duties next year

The gifts to the College for Women have been only a part of the recent large gifts to the university. Within a little over a year, or since President Thwing was inaugurated, the university has received in gifts about \$259,000. The Fayerweather gift of \$50,000 to Adelbert College Is nearly all paid in, and the entire fund will become available before next year.

The Adelbert College field day, after two postpon

ments on account of inclement weather, occurred last Monday. No records were broken. Stage, '92, as Monday. No records were broken. Stage, '92, as usual, carried off everything he entered for. In the evening a reception was held at the college, as is customary on field day. "The Reserve," the junior annual, is out. Among the illustrations are two from instantaneous photographs, showing the football team, which holds the State championship, in action.

By the establishment of the two new colleges next year, the Western Reserve University will consist of eight separate departments, and will have nearly ninety professors and instructors. There are about 500 students this year, and the indications point to a large increase in attendance next year.

GIFTS TO THE GERMAN SEMINARY.

Bloomfield, N. J., May 22.—Daniel Price, of Newark, has left a bequest of \$10,000 to the German Theo-legical school in this place. He has long been a good friend of the institution, contributing every year to its current support. He has also given generou at various times to special objects for the benefit of the seminary. He served at one time in its board of directors, but although his advancing years did not permit him to continue a member, he lost no opportunity to show his lively interest in the plans and principles here represented. His last gift during his life was last year, when he headed a subscription to purchase a lot for future enlargement. Mr. Price directed that if the condition of his property should

PROGRESS AT PRATT INSTITUTE. The Pratt Institute' High School has met with a s in the resignation of its director, William O. Pratt. Associated with the founder of the institute in his first steps toward its organization, Mr. Pratt subsequently assumed the direction of the technical high school. Popular with its students and the inspirer of their arduous work in class, his absence from his post is keenly felt. A serious illness and continued poor health were the causes of his resigna-

tion. The first food museum, the entire work of Pratt Institute, consisting of blocks, food-charts and analyed foods, has been sent to the Drexel Institute. Philadelphia, A second is in preparation for the Girls' industrial Institute at Milledgeville, Ga. Herecerts' industrial institute at Milledgeville, Ga.
